# Thread Status

## Thread Status Monitor for Windows Operating Systems

***by Software Verification***

*Welcome to the Thread Status software tool. Thread Status is a software tool that monitors the status of every thread in a particular process.*

*You can monitor thread status, wait reason, context switches, CPU usage per thread to identify that threads are doing in your application.*

*We hope you will find this document useful.*

# 2 How to use Say

Say provides a simple way to make your computer speak phrases or whole text files.

To use Say either provide a file to read or put what you want said on the command line.

Examples:

```
say -readThisFile textFileToRead.txt

say Build done.

say Hello World!

say Blowzabella are a great dance band.

say The quick brown fox jumped over the lazy dog.
```
